

AZURE DATABASE MIGRATION

Let's you migrate from multiple database sources to the Azure Cloud Platform with the least downtime.

Prerequisites before doing a Database Migration using Azure

- For site-to-site connectivity, create a Microsoft Azure Virtual Network using Azure Resource Manager Deployment Model.
- Ensure NSG rules don't block the outbound port 443 of ServiceTag for Service Bus, Storage and AzureMonitor.
- Enable TCP/IP protocol
- Configure Windows Firewall for database engine access
- Add firewall rules to allow Azure Database Migration Service

The Azure Database Migration Service (DMS) is available in 2 tiers: Standard & Premium.

Standard

Premium

Free	Free for first 6 months then (\$0.37/hour)
One-Time Migrations	Continuous Migrations
Offline Migrations	Online & Offline Migrations
4 vCORE	4 vCORE
Small to medium business workload	Large or Business Critical Workloads

How is the bill for DMS Premium calculated?

You can use 4 vCore Premium DMS Service for free for the first 183 days (6 months). Then you'll be billed at \$ 0.37 / hour.

How long can you use a Premium Tier DMS Service?

For upto 1 year from the date of service creation
